

## Air Quality & Noise Management

### What We Do

ESC provides a broad range of air and noise consultancy services to address and control air quality and environmental noise. We partner with public and private sector clients to resolve air, odour, and noise issues and ensure that our solutions are balanced with your business and technical needs.

Our purpose-fit solutions help you achieve industry best practice air quality and noise standards and mitigate any impacts.

With experience from country-wide inventories and modelling to individual site studies, our skills and tools have been tested, adapted and calibrated to the local Asian context. Whether evaluating innovative policies, testing alternative scenarios, assessing project impacts or conducting monitoring programmes, we deliver secure and holistic answers based on bulletproof science and a proven track record.

## Our Approach

Our experts use scientifically based methods, state of the art tools, and the most up-to-date technology to deliver solutions to manage your local and regional air quality and noise issues.

Whether evaluating innovative policies, testing alternative scenarios, assessing project impacts or conducting monitoring programmes, we deliver secure and holistic answers based on bulletproof science and a proven track record in Asia. Clients across industries benefit from our credibility and trust acquired through many years of dealing with regulatory authorities.
